COMPANY PROFILE

UESE (PVT.) LTD.

- *Solar Energy. Today's resource for a brighter tomorrow*
- *Realtime Security System Protection*
- *Analog/Digital & Communication Networking*

📍 **Office Address:**
Rana Villas Opposite Model Town Gate No.1,
Near Pak Turk School Building MPS Road Multan.

📍 **Workshop Address:**
Near Abdullah Flour Mills, Basti Kareemabad,
Bahawalpur Road Multan.

☎ **0300-1304030, 0313-2497777, 0322-8782745**

Introduction

United Elite Smart Energy (PVT.) LTD. (UESE) specializes in the manufacturing, modification, maintenance & Installation of Solar System, CCTV Setup, Data Communication and Networking.

UESE takes pride to have a dedicated team of professionals, with a vast industry experience in the Solar Installation, CCTV Installation and Network Engineering. The UESE customer-oriented culture motivates our employees to do their best for our customers, and has eventually earned UESE, the acknowledgement, appreciation, and above all the satisfaction of our valued customers.

UESE holds an excellent design department, staffed with the qualified Engineers cooperating

in excellent technical environment and highly skilled technicians. Our state-of-the-art manufacturing unit has resulted in the production of flawless products with complete guarantee and reliability.

The best
**ONES RIGHT
HERE**

MOTIVE

Carry success and well-being to our stake holders and society by adding value through technology and management.

VISION

Dedicated team striving to bring growth to the construction industry and assist our clients in making their dreams become a reality

MISSION

Vow to build different world by challenging the limits of Engineering, Procurement, Construction and Commissioning in delivering operational brilliance in each corner of company by meeting commitments and changing needs of our clients.

QUALITY POLICY

UESE is committed to

- Provide the best quality products with best service at competitive price for entire satisfaction of customer.
- Enhance our repute by providing quality in all our operations.
- Promoting mutual interests and trust with costumer, supplier, employees and shareholders.
- Providing a safe and healthy working environment to our community.

UESE MISSION

CCTV CAMERAS

OUR VALUES:

We at UESE strive to deliver to our customers the best in class services and we base our approach on the following core values:

- Integrity
- Quality
- Competency
- Team work and collaboration
- Efficiency
- Responsibility
- Innovation
- Confidentiality

Keeping and fulfilling the commitments Our goal is to become one of the top IT & Security system integrator companies in the region.

OUR EXPERTIES:

- Technical consultancy services
- IT Solution lifecycle management
- End to end custom IT Solutions
- IT Security management services
- IT Training services
- Professional networking services
- Professional support – Technical support
- Professional support Service

OUR SERVICES:

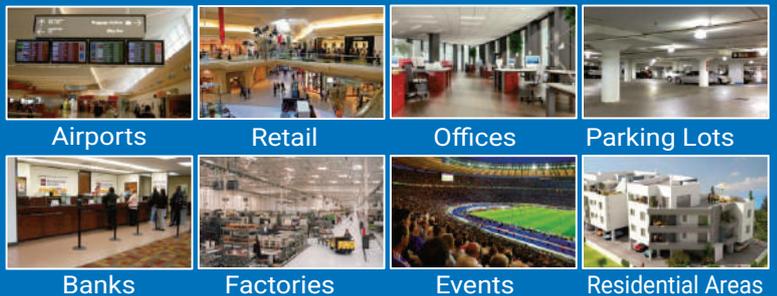

In 2015 company extends its expertise in following fields were added to company list:

- Analog CCTV Cameras
- IP Based Cameras and CMS system
- Cameras online view at web, mobile & PDA
- Fire Alarm System/Burglar Alarm System
- PABX Telephone Exchange
- Attendance Machines & Attendance Management System
- Door Access Controls
- Bomb & Explosive Detectors
- IP TV Solutions
- Networking Datacenter
- Fiber Optic Solutions
- Central Monitoring Control Room (Fiber Optic & Wireless Solutions)
- Local and campus networks
- Wide area networks
- Wan Technologies, Metro Ethernet, MPLS
- IP Unified Communications:
- IP Telephony, IP Contact Center
- Video Conference, Voice Messaging
- IP Telephony Applications
- Enterprise VoIP solutions

Enterprise Security:

- Posture Assessment Service
- Firewall, VPN, Intrusion Prevention Solutions
- Identity Management, Compliance Validation
- Endpoint security, Video Surveillance
- Wireless Networks
- Network Management
- Application Networking
- Storage Networking
- Data Center Networking

PROVIDING SECURITY TO VARIOUS FIELDS:

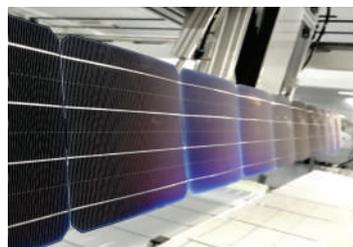

CCTV SECURITY:

Crime is on the rise - and the future prognosis does not lighten the picture. Our Lease and Rental CCTV Solutions should make this additional Crime Prevention Technology available to everyone.

We provide safety, security and surveillance solutions for all type of organizations such as Residential & Commercial Places, Educational Institution, Hotels, Malls, Industries, Shops etc. We have experienced Engineers for designing the appropriate solutions for any customer and provide System integration services using world class Security, safety and Surveillance solutions incorporating CCTV, IP Camera, Access control, Fire detection & Intruder alarm etc.

- Finance and Banking
- Parking Areas
- Educational Institutions
- Storage Facilities and Warehouses
- Construction Sites
- Gas stations
- Commercial Buildings
- Hospitals
- Marinas
- Shopping Complexes
- Manufacturing Plants
- Transporting Companies

EVENT MANAGEMENT:

From the last few years, UESE is providing CCTV security services to various fields and organizations. We at UESE provide unique solutions of Central CCTV Monitoring of different events through Fiber Optic, Wireless, WAN & V-SAT. All major events, especially happening in PAKISTAN are covered by us starting from 100 to 1,500 CCTV cameras with Control rooms.

ANALOG CCTV CAMERAS:

We are all aware that the future of security surveillance cameras are in IP products, however UESE knows that analog cameras are still going strong today. Analog cameras include TV lines Cameras, HD CVI Cameras, HD TVI cameras and AHD Cameras.

NETWORK IP CCTV CAMERAS:

IP cameras or network cameras are analogue or digital video cameras, plus an embedded video server having an IP address, capable of streaming the video (and sometimes, even audio).

DIGITAL VIDEO RECORDERS:

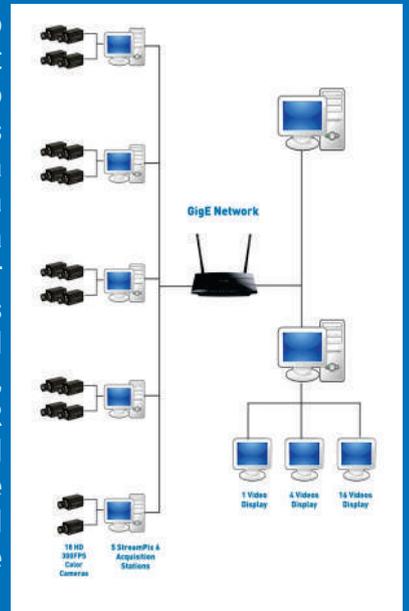

Provides superb performance for recording and nationwide monitoring. Digital video recorders are often integrated in the LCD and LED TV-

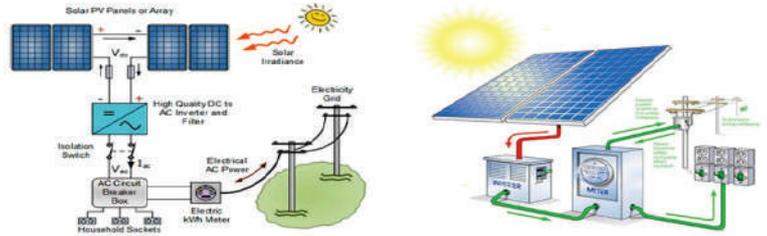

sets. Digital video recorder (DVR), is a consumer electronics device or application software that records video in a digital format to a disk drive, USB flash drive, SD memory card or other local or networked mass storage device.

NETWORK VIDEO RECORDERS:

Network video recorders are distinct from digital video recorders (DVR) as their input is from a network rather than a direct connection to a video capture card or tuner. Video on a DVR is encoded and processed at the DVR, while video on an NVR is encoded and processed at the camera, then streamed to the NVR for storage or remote viewing.

SOLAR ENERGY

United Elite Group of Companies was established with a vision of contributing back to the motherland, Pakistan. UESE is working in the fields of Power Sector with a focus on Renewable Energy, Learning & Development, Education, Imports & Exports and Consultancy Services for both public and private sectors on large scale projects.

With a National and International channel of Business Partners, UESE is bringing a revolution through its dynamic approach towards business and innovation in Pakistan and at a Global Level.

SOLAR ENERGY
Energy from the Sun that converted into electricity using Pv panels.

How Solar Energy System works?

- 1 Solar panels turn sunlight into DC energy.
- 2 Inverter converts the DC energy to AC electricity.
- 3 Service Panel distributes power where needed through your home.
- 4 Utility meters track energy produced and energy used.
- 5 Grid connection ensures access to continuous power at light.

Core Values

Integrity Empowerment Will to Win Customer Commitment Innovation HSE

- 01 Integrity
- 02 Empowerment
- 03 Will to Win
- 04 Customer Commitment
- 05 Innovation
- 06 HSE

- 01 SITE SURVEY
- 02 DESIGN
- 03 EXECUTION
- 04 COMMISSIONING
- 05 HANDOVER
- 06 O&M

Why UESE ?

- Remote Monitoring & Operations.
- Round The Clock After Sales Services.
- Transforming Energy Consumption Patterns.
- Cloud Monitoring & Data Storage of Production.
- Foreign Qualified Engineers Facilitating Consumers.
- Zero Export Features, IV Curve Diagnostic Features.
- Affordable Solutions Through Easy Financing Schemes.

On-Grid System

You don't have to worry about storing any energy; the grid will usually be there to make sure all the loads can run when the user wants them.

ON-Grid Applications:
- Solar Home system.
- Feed in Tariff (FIT).

Solar panels convert sunlight into DC power (12 v to 24 v)

The inverter converts DC power into 240 volt AC power for household use

When solar production exceeds home consumption the meter measures your export and your account will receive a credit

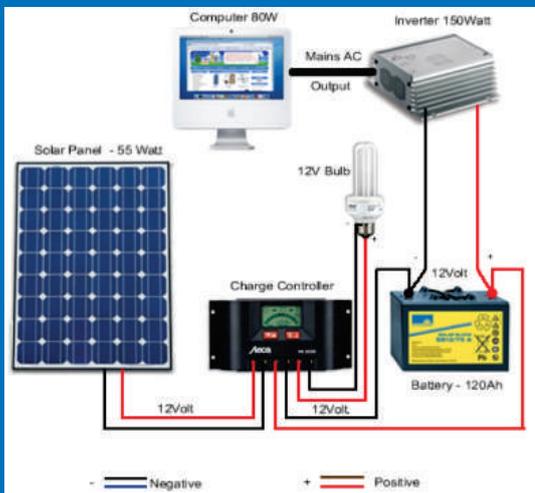

Any surplus electricity simply flows back into the mains grid for use elsewhere

Engineering Consultancy

We always strive to achieve high standards of quality engineering service at the most competitive rates while practicing quality control measures, cost effective methods and proper use of latest tools and technologies enabling client satisfaction.

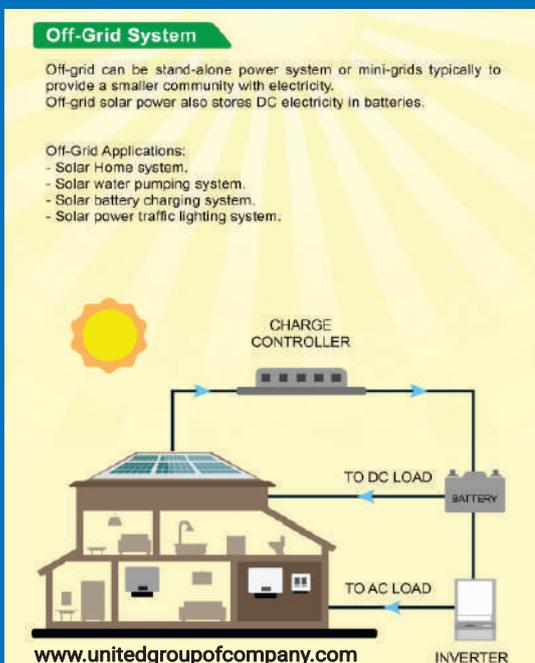

Solar Energy

UESE Energy's Turnkey Solar Solutions for Industrial, Commercial, Domestic & Agricultural segments are designed by our foreign qualified engineers to deliver best results using the latest equipment & techniques.

Energy Monitoring Systems

UESE Energy Monitoring System enables the end consumers to monitor energy consumption patterns through special cloud based metering system for monitoring purposes.

INDUSTRIAL SOLUTIONS

Industrial Solar Solution is a power conditioning unit which itself is an energy generation plant for powering the whole industry. At UESE we provide customized designs to our clients, depending upon their load requirement and energy utilization along with Net Metering facility.

COMMERCIAL SOLUTIONS

UESE Energy now has the most accessible, reliable and cost-effective solution for your business. Adding a Solar Power Generating System to your enterprise is a responsible business decision that can quickly minimize your energy costs, save you from the hassles of price hikes and highlight your business as an environment friendly enterprise.

RESIDENTIAL SOLUTIONS

UESE Energy Technical Experts specialize in creating customized designs that are tailored to meet the specific requirements of our clients with our expertise at your disposal, you can choose to convert your residence to a green home and contribute to the environment while saving yourself from the burdens of energy price hikes through Net Metering.

AGRICULTURAL SOLUTIONS

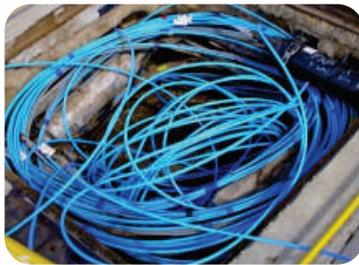

We aim to provide sustainable farming through renewable energy based water supply in Pakistan. The Solar tube well solutions are a one-time investment resulting in a lifetime water supply through completely clean energy with no damage to the agricultural land. We also offer drip irrigation systems for improving the overall yield and efficiency of agricultural farms.

NETWORKING

UTP STRUCTURE CABLING FIBRE OPTIC CABLING

The installation of fibre optic cable is the main backbone link between equipment rooms and telecommunications closets, of all major fibre optic network solutions, campus network solutions, and where there is a need for large network data transfer within data storage centers. It is also the main backbone link for Metropolitan Area Networks (MAN), Local Area Networks (LAN), Wide Area Networks (WAN) or if there is a cable length issue with using copper cable solutions like Cat5 or Cat6 cabling systems (maximum 90m copper cable installation).

TELECOMMUNICATION

Telecommunications and Networking Services (TNS) is responsible for the design, infrastructure, maintenance, and support of the network, telephone services, software, and hardware. We have five sub-departments: GLOBAL Telecommunications Services, Data Networking Services, Classroom Technology & Video Services, Help Desk, and Technology Support Services (TSS). Value-oriented, basic VoIP call experience for hospitality environments Ideal for lobbies, guest rooms, elevator bays, and conference centers Supports both desk and wall-mounted deployments Include your brand with co-branding plate and paper insert Earth-friendly; IEEE Class 1 rated for low power consumption.
